SOFTWARE DEVELOPMENT | AIDANPELLE.GITHUB.IO

OBJECTIVE

I'd like to further develop my skills as a programmer and gain more experience in such an interesting field.

SKILLS

I primarily code in Java, with some experience with JavaScript. I've completed a certificate in Excel and worked with SQL databases for about a year. While my programming experience may be lacking, my desire to learn is not.

WORK EXPERIENCE

WEBSITE DEVELOPER • JULY 2020 - PRESENT
I'm currently in the process of putting together a website using Squarespace using some CSS customization that's primarily focused on providing training services.

SHIFT LEADER • PEET'S COFFEE & TEA • APRIL 2019 – JUNE 2020
While primarily working as a shift leader, I expanded my role in the company to include creating an Excel sheet to automate tip pool distribution, manage invoices, receive product shipments, and lead a team of 3-5 people daily.

EDUCATION

SOFTWARE DEVELOPMENT DIPLOMA • MAY 2022 • SAIT
Currently maintaining a perfect GPA, looking to further my knowledge in programming and software development.

HIGH SCHOOL DIPLOMA • JUNE 2017 • TERRA LINDA HIGH SCHOOL
Graduated with a perfect GPA while learning French and Spanish, volunteered on the side and participated in water polo and swim team.
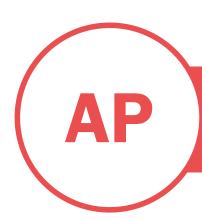

OTHER EXPERIENCE

I've recently completed a basic RPG videogame as a gift for a friend. It's medieval themed using event-driven programming with JavaFX. I've found it's a good way to become familiar with other programming paradigms. I'm purposefully avoiding using apps such as Scene Builder in order to become more familiar with the JavaFX classes.
